### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: applicant recites a detachable and movable track section adapted to support a track following vehicle, which is large enough to carry a plurality of people. The movable track section is elongated to define a first axis. A drive system is adapted to move the movable track section between a low first position and a higher second position. A tilter is operatively coupled to the movable track section to cause the first axis of the movable track section to be tilted in to a horizontal angle when the track section is in the first position and to cause the first axis to be tilted into a non-horizontal angle when the movable track section is in the second position. The system is further comprised of a track continuation section to which the movable track section is detachably attached so that the vehicle can move between a first support state where the vehicle is supported by the movable track section and a second support state in which the vehicle is supported by the track continuation section.

The prior art made of reference, taken singularly or in combination, does not adequately disclose the features recited in the instant claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
